

ELECTRONICS COMMITTED TO DEFENSE

In 2022, the budget for the armed forces increased to €41 billion, up €1.7 billion compared to 2021 and 9 billion more than in 2017. The 2019-2025 Military Planning Law (MPL) is in keeping with Ambition 2030 and aims to build a comprehensive and balanced army model that rises to the strategic challenges. The resources made available will ensure major equipment is upgraded and will allow for significant investments in the recruitment, innovation, and strategic sectors, such as the spatial domain. Cofidur EMS brings its expertise to new defence sectors such as robotics, artificial intelligence, and simulation.
