

ELECTRONICS COMMITTED TO AVIATION

The French and European aviation industry is a sector of excellence that combines innovation with social and environmental performances. Reducing the impact on the climate is today's priority, which is why air transport must reduce its global CO2 emissions to reach «net zero emissions» by 2050. Progress in digital technology and connectivity, along with modernisation of air traffic management, are levers for transformation that include a significant new leap in flight safety provided by crew assistance functions, a significant reduction in the environmental footprint of air transport, and increased productivity and punctuality of aeronautical operations. Cofidur EMS is your partner of choice to assist in creating the decarbonised, digital, connected aircraft of the future.

€74M

400 EMPLOYEES

OUR SOLUTIONS

MORE THAN 50 YEARS EXPERTISE
DEVELOPMENT & DESIGN WITH OUR PARTNERS (VIVERIS & REOREV) IN MECHATRONICS AND EMBEDDED SOFTWARE

DEDICATED INDUSTRIAL SUPPORT TEAM
TIME TO MARKET PROJECT MANAGEMENT
COLLABORATIVE AND TRANSPARENT COMMUNICATIONS

OUR PROCESS

IPC CLASS 3
CLIENT SOURCING MANAGEMENT
SMALL AND MEDIUM-SIZE PRODUCTION RUNS
BOARD TECHNICALITY AND COMPLEXITY (MULTI-LAYER, TRIPLE REFLOW, FLEX)

ROHS - LEAD PROCESS
BATCH/CUSTOMISED TRACEABILITY
BURN-IN, IN-SITU TESTING, VIBRATION TESTING
INTEGRATION / FUNCTIONAL TESTING

TROPICALISATION (MANUAL / AUTOMATED)
WIRING MODIFICATIONS
OBSCOLESCENCE MANAGEMENT
