

ELECTRONICS COMMITTED TO TELECOMMUNICATIONS

The surge in the use of telecommunication services during the pandemic, led to unprecedented growth in the global telecommunications market. The increasing demand for high-speed connectivity and fast data transfer protocols brings additional opportunities. This seemingly limitless capacity for dialogue between people via multiple terminals (and, in the future, between tens of billions of objects, sensors, robots, etc.) was only possible thanks to the incredible ability to process and memorise information acquired through digital tools reduced to tiny processors containing nanometric elements, all in the very short time span of a generation. Cofidur EMS will guide you for greater progress in this dynamic process.

€74M

400 EMPLOYEES

OUR SOLUTIONS

MORE THAN 50 YEARS EXPERTISE
DEVELOPMENT & DESIGN WITH OUR PARTNERS (VIVERIS & REOREV) IN MECHATRONICS AND EMBEDDED SOFTWARE

DEDICATED INDUSTRIAL SUPPORT TEAM
TIME TO MARKET PROJECT MANAGEMENT
COLLABORATIVE AND TRANSPARENT COMMUNICATIONS

OUR PROCESS

PURCHASE OPTIMISATION EUROPE-ASIA
SMALL- MEDIUM- LARGE-VOLUME PRODUCTION
COMPONENT TRACEABILITY
RAMP-UP MANAGEMENT

ROBOTISATION OF PRODUCTION AND INTEGRATION
FULL INTEGRATION
LOW COST SOLUTION
PACKAGING - KIT AND LOGISTICS
